

This listing of the claims will replace all prior versions, and listings of claims in the application.

In the Claims

1. (Currently amended) A method for keeping expenses in an Internet expense account comprising;

swiping a card having a person's email address on said card through a card reader;

entering information about said expense into said card reader;

[entering] sending said information automatically into fields of said Internet expense account without manual intervention.
2. (Currently amended) The method of claim 1 wherein further expense information is entered into the Internet expense account other than said information from said card.
3. (Currently amended) The method of claim 1 wherein information from said card can not be deleted once it is sent into said fields of said internet expense account.
4. (Currently amended) A system for generating an Internet Expense Account comprising:

a card having a person's email address

a text document made up of fields;

said text document being part of an email server;

said system transferring [allowing] information [to be transferred] from said card to said text document without any manual intervention.

5. (Original) The system of claim 4 wherein said fields include expenses, date, and name of party to whom payment is due.
6. (Original) The system of claim 4 wherein said fields further comprise to whom said expenses are billable.
7. (Currently amended) The system of claim 4 wherein said system allows further expense information to be inputted into said text document.
8. (Currently amended) The system of claim 4 wherein said information transferred from said card to said text document can not be changed [in said text document].
9. (Currently amended) The system of claim 4 wherein said system divides said information transferred from said card into said text document into separate fields.
10. (Original) The system of claim 9 wherein said fields include travel, food and accommodations.
11. (Original) The system of claim 7 wherein said further information is inputted by a wireless device.
12. (Currently Amended) A method for keeping expenses in an Internet expense account comprising;
- entering information into a wireless device which is connected to a user's email account;
 - said information concerning expenses incurred by said user;
 - [entering] sending said information automatically into fields of said Internet expense account without manual intervention.
